### Description

-Abbreviations; LOQ: Limit of Quantitation, R: Recovery, U: Uncertainty, C: Conformity, V: Valid, NV: Not Valid, NE: Not Evaluated

-When the conformity assessment of the test results is given, the regulations, communiqués, standards, specifications, contracts, etc., if any, the decision rule specified in the documents is used. If there is no decision rule specified in the legislation, the Simple Decision Rule is applied without considering the measurement uncertainty.

-Sampling is performed by laboratory, the uncertainty of measurement is included in the uncertainty from sampling. The uncertainty specified in the report is k=2, expanded uncertainty at the 95% confidence interval.

- In cases sampling is not performed by laboratory, the results are valid as the sample is received and laboratory is not responsible for the sampling phase.
